

Become a member of SWAMID

An organization that wants to *provide* identities - i.e operate an Identity Provider (IdP) - within the SWAMID federation must become a member of SWAMID.

Membership Process

1. Apply for membership in SWAMID by reviewing the [SWAMID Policy](#) and submitting a signed copy of the [SWAMID Membership Agreement](#) along with an [Identity Management Practice Statement](#). Before you can be a member of SWAMID you must also conform to one of [SWAMID Assurance Profiles](#).
2. When the membership is approved you are free to deploy identity providers in SWAMID. Normally a single identity provider per technology profile is required but there are exceptions to that rule. Contact [SWAMID Operations](#) for more information.

Guidance

- Perform an internal "audit" of your identity management based on your [Identity Management Practice Statement](#).
- Select software from the list of [recommended software for SWAMID WebSSO](#).
