

Sunet Trusted Certificate Service

Sunet Trusted Certificate Service (TCS)

SUNET is part of the GÉANT TCS service since 2007 (although it was TERENA SCS back in those days). The backend for the service has been provided by GlobalSign, Comodo, DigiCert (2015-2020) and Sectigo (2020-). SUNET customers can become members of the SUNET TCS service without extra charge and get server, client and code signing certificates.

Instructions

Certificate requestors: please see your own organization's web pages about TCS certificates.

Certificate administrators, see [SUNET TCS 2020- Information for administrators](#) for information about the current system.
